

Fundamentals of Hydraulic (FOH) Course Outline

The FOH course is designed for plant engineers, plant maintenance, technicians/mechanics, millwrights, & hydraulic equipment operators.

The One-Week Course includes the following:

- Basic Math & Physics Review
- Introduction to Hydraulics Section:
 - Safety
 - What hydraulics is and is not
 - Why use hydraulics
 - Advantages of hydraulics

• Hydraulics General Principles:

- Principles of Pressure
- Principles of Flow
- Pressure Drop
- o Power

• Fixed Hydraulic Pumps Section:

- What pumps do and don't do
- How pumps work (four types)
- Flow rate and pressure
- Pump math
- Pump ratings
- Mounting types
- Shaft types & alignment
- Pump efficiency
- Power required to drive a pump
- Pump inlet conditions
 - Cavitation
 - Aeration

• Actuators Section:

- Cylinders
- Motors (fixed displacement)
- \circ Speeds
- Force/Torque
- Types, mounts, shafts/rods
- Actuator math
- Actuator power

- Basic Circuit Symbols:
 - Symbols explanations
 - How to read circuit drawings
- Industrial Valves Section:
 - Directional Control Valves
 - Pressure Control Valves
 - Flow Control Valves
 - Valve math
- Fundamentals of Conductors:
 - Hose
 - Tubing
 - o Pipe
 - Fittings
- Fluids Section
- Reservoirs Section
- Fluid Conditioners Section:
 - Filters
 - Heat Exchangers
 - Heaters
- General Safety Section

Classes: 8 Am to 5 PM Daily (Mon thru Fri)

Friday may end earlier, but plan for a full day.

Class Format: 75% Lecture; 25% Hands-On

Students will receive (3) Books & various handouts.

Lectures/labs begin promptly at the top of the hour and run for 50 minutes, with a 10-min break each hour.

Lunch break: 11:50 AM – 1:00 PM Daily

ETS provides lunch in the classroom each day, but students are free to leave if they choose.

Coffee, soda, water & snacks are provided in the classroom throughout each day.

ETS hosts a group dinner on Thursday at a local venue.
